

POSTURE GUIDE

FaceYoguez

Sit Well, Work Well

Five steps to a body that supports you all day

EVERYDAY DESK POSTURE · FACEYOGUEZ

Set Up Your Space

Create a workspace that supports good posture every day.

SIT PROPERLY

- ✓ Hips slightly higher than knees
- ✓ Sit on your sit bones, not your tailbone
- ✓ Back supported, not slouched

RAISE YOUR SCREEN

- ✓ Use books, stand, or external keyboard

Top of screen
at eye level

RELAX YOUR ARMS

- ✓ Elbows near body
- ✓ Shoulders relaxed
- ✓ Forearms supported

Sit properly · raise your screen · relax your arms

SET THE SCENE

1

Sit properly

Hips slightly higher than knees; sit on your sit bones, not your tailbone; back supported, not slouched.

2

Raise your screen

Top of the screen at eye level. Use books, a stand, or an external keyboard — don't work looking down at a laptop for hours.

3

Relax your arms

Elbows near your body, shoulders relaxed, forearms supported.

CUE

"Bring the screen to you — sit ready, not collapsed."

10-SECOND CHECK

- Am I sitting upright?
- Is my screen at eye level?
- Are my arms relaxed?
- Are my feet supported?
- Is my back supported?

AVOID THESE

- Slouching — a forward, rounded back.
- Screen too low — looking down for hours.
- Elbows away from the body or unsupported.

REMEMBER

A small setup change creates big posture benefits.

Stack Your Body

Build a strong, aligned foundation — from the ground up.

Ears over shoulders over ribs over pelvis

✓ STACK FROM THE FLOOR UP

- 1 **Feet grounded**
Flat on the floor or resting on a footrest.
- 2 **Pelvis neutral**
Sit upright with a neutral pelvis — not tucked or arched.
- 3 **Ribs over pelvis**
Ribs stacked directly above the pelvis.
- 4 **Shoulders over ribs**
Shoulders aligned directly over the ribs.
- 5 **Ears over shoulders**
Ears aligned directly over the shoulders.

MAIN CHECK

“Are my ears over my shoulders?”

🛡️ WHY IT MATTERS

- Better alignment reduces strain and fatigue.
- Improves breathing and energy.
- Enhances focus and performance.
- Protects your spine, neck, and joints long-term.

REMEMBER

Stack up, not slouch down. Small adjustments, big difference.

STEP

3

Micro Reset (1 minute)

Every 30–45 minutes, take one minute to reset and feel better.

The five-move, one-minute reset

CUE

“Reset before collapse.”

THE ONE-MINUTE RESET

1

Lift chest gently

Open your chest without leaning back.

2

Lengthen neck

Gently draw the crown up and back.

3

Relax jaw

Unclench your jaw and let it be soft.

4

Roll shoulders back once

Up, back, and down — just once.

5

Take 5 slow breaths

In through the nose, out through the nose. Five times.

BREATH FOCUS

- Feel your ribs expand sideways on the inhale.
- Feel them soften down on the exhale.
- Keep your face, eyes, and jaw relaxed.

QUICK REMINDER

- Do it every 30–45 minutes.
- Takes only 1 minute.
- No stretching, no strain — just reset.
- Better posture, better focus, less pain.

REMEMBER

Small reset. Big difference.

Protect Your Neck & Jaw

Small habits. Big protection.

Lips together · teeth apart · tongue relaxed

✗ WHAT TO AVOID

- ✗ Don't push your chin forward.
- ✗ Don't clench your jaw.

✓ WHAT TO KEEP

- ✓ Lips together.
- ✓ Teeth apart.
- ✓ Tongue relaxed, resting on the floor of your mouth — not pressing.

✓ QUICK SELF-CHECK

Neck long?

Ears over shoulders, not in front.

Jaw soft?

Relaxed, not tight.

Breathing easy?

Quiet nasal breathing.

Face calm?

Forehead smooth, eyes soft.

✓ WHY IT MATTERS

- Forward head and jaw tension strain the neck muscles.
- Clenching can cause headaches, jaw pain, and wrinkles.
- Relaxed jaw + neutral neck = less tension, better posture, a healthier face.

REMEMBER

A relaxed jaw and neutral neck protect your posture, your face, and your well-being.

Optional Supports

Helpful tools for better posture and less strain.

✓ THREE TOOLS WORTH HAVING

✓ WHAT THEY DO FOR YOU

- Reduce lower-back strain and help maintain natural posture.
- Keep your feet grounded and improve circulation.
- Bring the screen to eye level and keep elbows near your body.
- Reduce neck, shoulder, and wrist strain during long hours.

REMEMBER

*Good support helps your body do less work.
Comfort today prevents pain tomorrow.
Small tools, big long-term benefits.*
